

IMRAN ALI KHAN

Flutter Developer

 imranalikhan878@gmail.com  +923339837704  Lahore, Pakistan

 linkedin.com/in/imran-ali--khan  github.com/imran-ali-khan

Flutter developer skilled in building fast, scalable, and maintainable mobile applications using Dart. Experienced in clean architecture, REST API integration, and Agile workflows, with a strong focus on performance, secure coding, and delivering smooth user experiences across Android and iOS.

SKILLS

Languages: Dart, Python, C++

Mobile Development: Flutter, Flutter Web, Android/iOS Deployment, ShoreBird

State Management: Provider, BLoC, Riverpod, GetX

Backend & APIs: Firebase (Auth, Firestore, Functions, FCM), REST APIs, WebSockets, FastAPI (basic)

Tools & Services: Android Studio, VS Code, Claude Code, Cursor, Antigravity, Git, Postman, Figma, RevenueCat, Stripe, Google Maps API

Others: Clean Architecture, MVC/MVVM, Offline-first Apps, Push Notifications

EXPERIENCE

SOFTWARE ENGINEER | FLUTTER

03/2025 – Present | Lahore, Pakistan

ISKAAN TECH

- Led **redesign and refactoring** of multiple cross-platform real estate CRM applications, upgrading Flutter SDK versions and improving code quality and maintainability.
- Designed and developed a **new SaaS product**, handling architecture setup, API integrations, deep linking, and password reset workflows using Dio and GetX.
- Implemented **state management** with BLoC and Provider for scalable, maintainable app logic.
- Built **responsive and user-friendly UI screens** based on wireframes and design guidelines, ensuring seamless UX across platforms.
- Managed **app deployment** to the Play Store and TestFlight, including integration of Shorebird for app releases.
- Collaborated with Agile teams, participating in sprint planning, code reviews, and maintaining high code hygiene through testing and refactoring.

SOFTWARE ENGINEER | FLUTTER

02/2023 – 03/2025 | Lahore, Pakistan

SENARIOS PVT LIMITED

- Integrated **RESTful APIs** for multiple apps, enhancing data flow and user interactions.
- Implemented **Mixpanel API** integration for analytics, improving tracking and user engagement.
- Improved **Buyer App filters** using **BLoC**, optimising Buyer-Agent Tour Planning and Scheduling.
- Integrated **Google & Facebook Sign-In**, **REST APIs**, and **real-time chat** using **MQTT** for a seamless user experience.
- Developed **offline data storage**, **contact sync** with server/local database, and UI enhancements aligned with iOS standards.
- Refactored tightly coupled code for maintainability and performance improvements.
- Integrated **AI APIs** for chatbot functionality in the Chat My Book App.

- Performed **bug fixes and feature improvements** for the Workout App, ensuring smooth app functionality.
- Applied **Provider** and **BLoC** state management patterns across projects for scalable and maintainable architecture.
- Managed **app deployment** to Play Store and TestFlight, ensuring smooth release cycles.

SOFTWARE ENGINEER | FLUTTER

01/2022 – 02/2023 | Lahore, Pakistan

BJS SOFT SOLUTIONS PVT LIMITED

- Assisted in the **migration of legacy products** from Windows to Flutter Android, implementing **Platform Channels** to control hardware interactions.
- Converted **GetX state management** to **BLoC** for enhanced modularity and maintainability.
- Developed authentication flows and implemented **clean architecture (MVC)** for AR-enabled sales applications.
- Designed and integrated **API modules** using **Dio** with **MVVM architecture** for task and workflow management apps.
- Contributed to **Journey Planner and Task Assignment modules**, integrating real-time APIs for supervisor and worker management.
- Developed **Permission-based access features** for multi-role apps (Admin, Managers, Supervisors, Workers), ensuring secure and structured data visibility.
- Built **responsive UIs** for multiple applications, aligning with platform design standards and improving user experience.
- Supported **e-learning and certification tracking features** for workforce management apps, enabling seamless monitoring and alignment of staff training.
- Collaborated with senior developers on **feature enhancements**, bug fixes, and the implementation of new functionality across multiple apps.
- Led a team of 2 developers, managing task allocation and code reviews

EDUCATION

BS (HONS.) SOFTWARE ENGINEERING

2017 – 2021

The University of Haripur

PROJECTS

Stovoo (GetX, Maps, Multi-Role App, Food Delivery, Real-Time Location, RESTful APIs)

Developed core modules for a single-app multi-role food delivery system, covering customer ordering, rider tracking, and restaurant control using GetX, Google Maps, and optimized API integrations.

Android  | iOS 

Hunt and Harris RE (MVVM, Provider, REST APIs, FCM, Role-Based Access)

Dubai real estate app with Property Management and CRM modules. Permission-based login allows module switching. Includes leads, listings, viewings, tasks, notes, schedules, calendar, and push notifications.

Android  | iOS 

GPG Global CRM (Provider, MVVM, REST APIs, Push Notifications, Local Storage, Biometric Auth)

Dubai property CRM offering leads, listings, viewings, tasks, notes, and calendar workflows. Biometric login and real-time notifications enhance efficiency for agents.

Android  | iOS 

Fire Kirin Guide App (Flutter, Clean Architecture, Riverpod, Firebase, OneSignal)

Built a static guide app with tips, rewards (Wheel of Fortune), email verification via EmailJS, and Firestore-based support; integrated OneSignal notifications and deployed the app to the Play Store.
Android [🔗](#)

Doted Driver (Flutter, Clean Architecture, Provider, REST APIs, Notifications, Local Secure Storage)

Designed complete UI and integrated backend APIs; enabled driver login, pickup/drop-off signatures, and continuous background location tracking and deployed the app to both Play Store and App Store.
Android [🔗](#) | iOS [🔗](#)

Creative Homes CRM (Provider, REST APIs, Push Notifications)

Agent-focused Dubai CRM for lead management, property listings, and task tracking. Optimized UI and state management for smooth workflows and in-app notifications.
Android [🔗](#) | iOS [🔗](#)

ReloRadar (BLoC, Dio, Deep linking, Google Maps, Mixpanel, Firebase: Social Logins, Dynamic Links)

Developed a US-based real estate platform enabling property purchases, direct mailing, user behavior tracking, and scheduled multi-home tours with agents for a seamless buying experience.
Android [🔗](#) | iOS [🔗](#)

Sure CRM (Provider, MVVM, REST APIs, FCM, Biometric Auth)

Dubai real estate CRM with full lead, listing, task, and schedule management. Features calendar views, in-app and push notifications, and biometric login for secure agent/admin operations.
